Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1) The documents mentioned in this communication are numbered as in the search report, i.e. D1 corresponds to the first document of the search report.

2) Novelty: Article 33(2) PCT

The subject-matter of claims 2, 4, 6-7, 11-12, 18-19 is not considered new in the sense of Article 33(2) PCT for the following reasons:

D1 discloses the production and characterization of a monoclonal antibody, Mab 25, specific for the human lymphocyte low affinity receptor for the Fc fragment of IgE: CD 23. The affinity constant of Mab 25 is Ka: 10¹⁰ M⁻¹ (p. 2973). D1 also discloses Fab fragments of Mab 25 and biotinylation of Mab 25 (p.2972). The IPEA considers Mab 25 described in D1 to fall under the scope of claims 2, 4, 6-7 of the present application.

D2 also describes anti-CD23 Mab 25 (see examples 10-12) as well as other binding agents to CD23. D2 describes the use of CD23 binding agents in the treatment or prophylaxis of various diseases. In particular, D2 discloses antibodies specific for CD23, fragments thereof, humanized antibodies, methods of use of said antibodies in human therapy, and in pharmaceutical compositions in combination with an immunomodulatory or anti-inflammatory agent (see claims). Therefore, the subject-matter of claims 2, 4, 6-7, 11-12, 18-19 is not considered new.

The subject-matter of claims 1, 3, 5, 8-10, 13-17 has not been made available to the public by any of the available prior art documents and can therefore be regarded as novel.

The subject-matter of claims 1, 3, 5, 8-10, 13-17 cannot be derived from the available prior art in an obvious manner and therefore complies with the requirements of Article 33(3) PCT.

(57) Abstract

The invention relates to antibodies which bind to the CD23 (FCeRII) type II molecule particularly altered antibodies including antibodies which bind to the CD23 (FC∈RII) type II molecule characterised by an affinity constant equal to or greater than 1x109 Ka Mo1-1 the preparation of such antibodies, pharmaceutical compositions which contain such antibodies and their use in therapy particularly in the treatment of autoimmune and inflammatory disorders.
